When the coin is inserted, the dryer will operate for 2 minutes approx. then switch off. The internal timer is adjustable from 30 seconds to 3 minutes approx

CLEANING

It is a known fact that stainless steel can show signs of 'rusting' in high chlorine areas, especially where high ambient temperatures are involved. To minimise this, the stainless case must be wiped down regularly. Do not use abrasive cleaners. Due to this phenomenon, the manufacturers will not be responsible for this cosmetic occurrence.
